Agenda

- Status quo
- Goals
- Architecture
- Navigation
- Screenshots of the UI Draft

Status Quo

- Qacct commandline client
- No GUI
- Qacct based on accounting file
- Other interesting data not available via qacct
- sge_sharemon delivers policy related 'accounting data'
- Only tabular representation

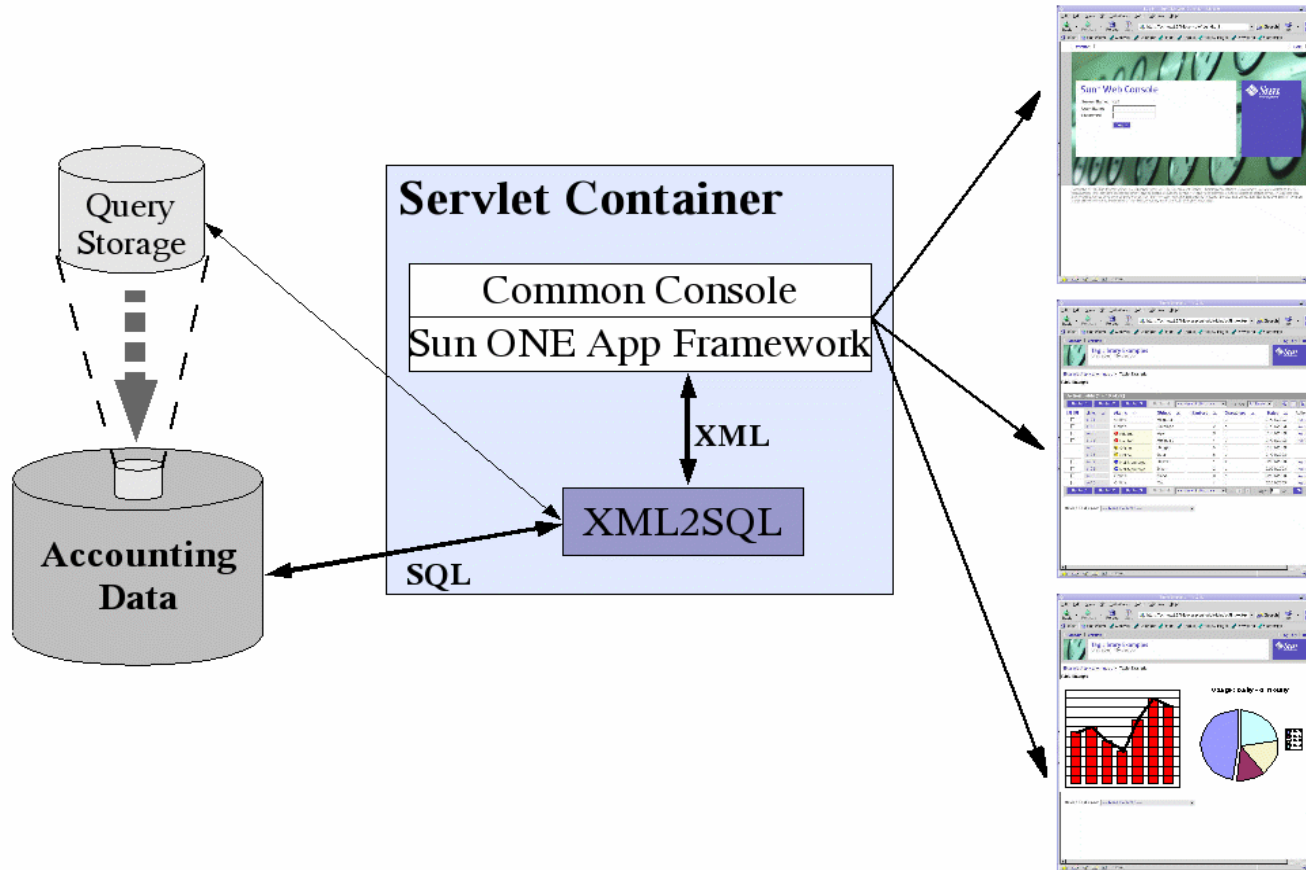

Goals (1)

- Accessible via web browser
- Unify the information of qacct, sge_sharemon etc.
- Access to derived usage statistics
- Predefined set of standard queries
- Addition of site specific queries
- Tabular & graphical presentation
- Easy query definition

Goals (2)

- Better scalability
- Export of data for postprocessing
- Automated Reports
- Four categories of accounting areas
 - Job
 - Host/Queue
 - Policy
 - System

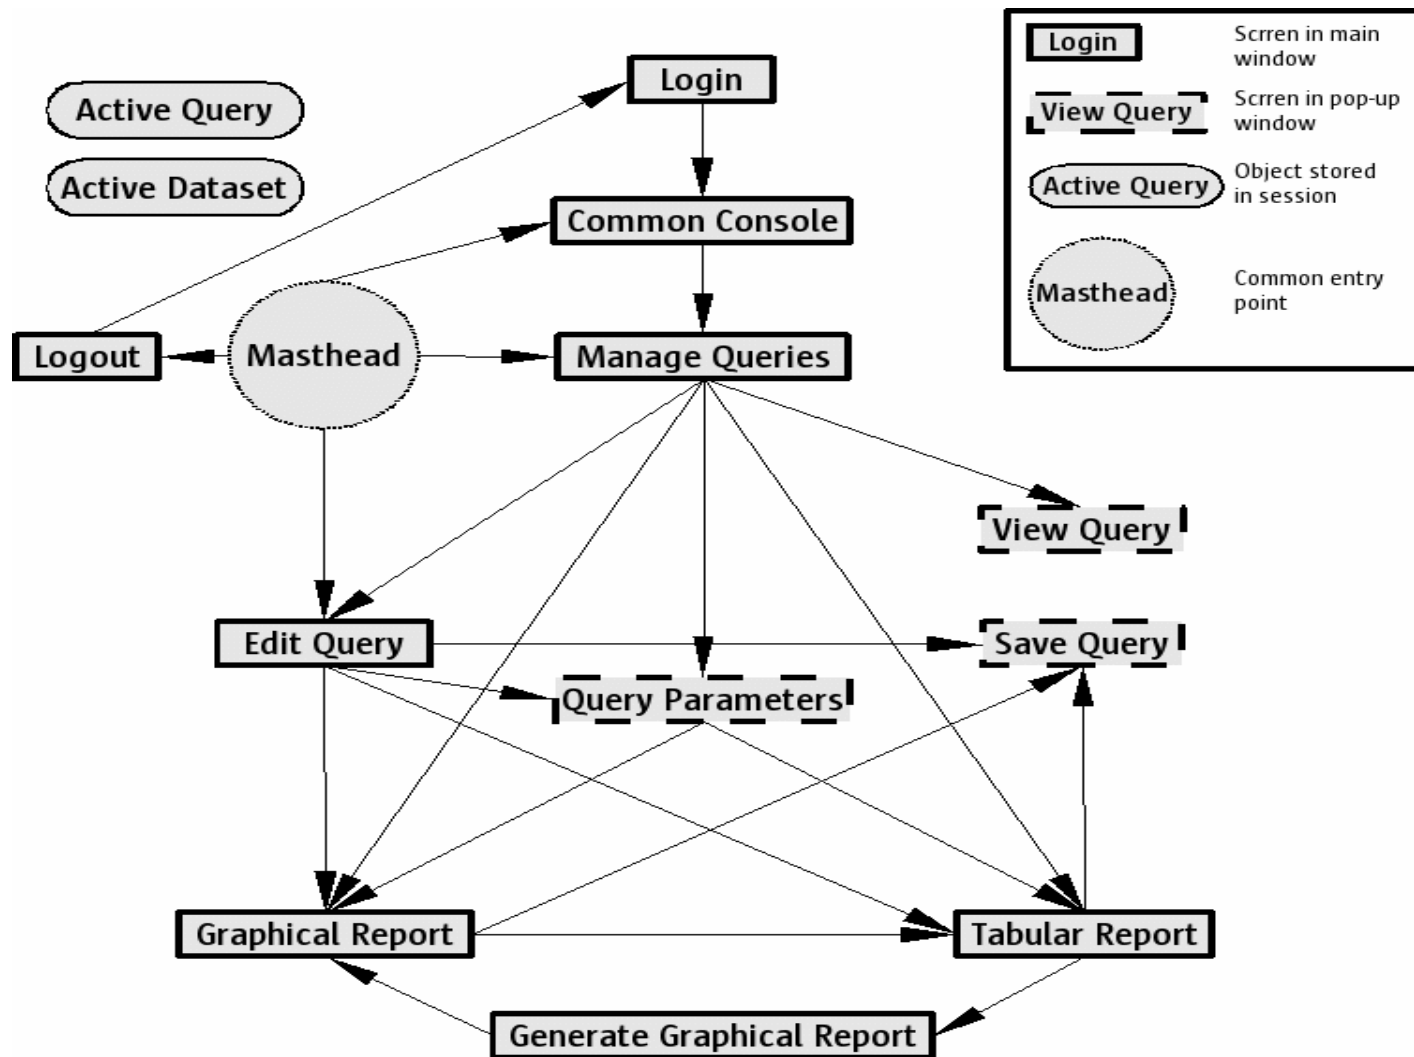

Architecture

Architecture (2)

- Accounting DB
- Accounting & Reporting Web App
 - Sun Web Console/S1AF based
 - Model part shall be runnable as commandline application as well for scripting
 - I18n, 508 compliance
 - report query definitions stored as xml
 - Common services like authentication and authorization from Sun Web Console
- Web Browser

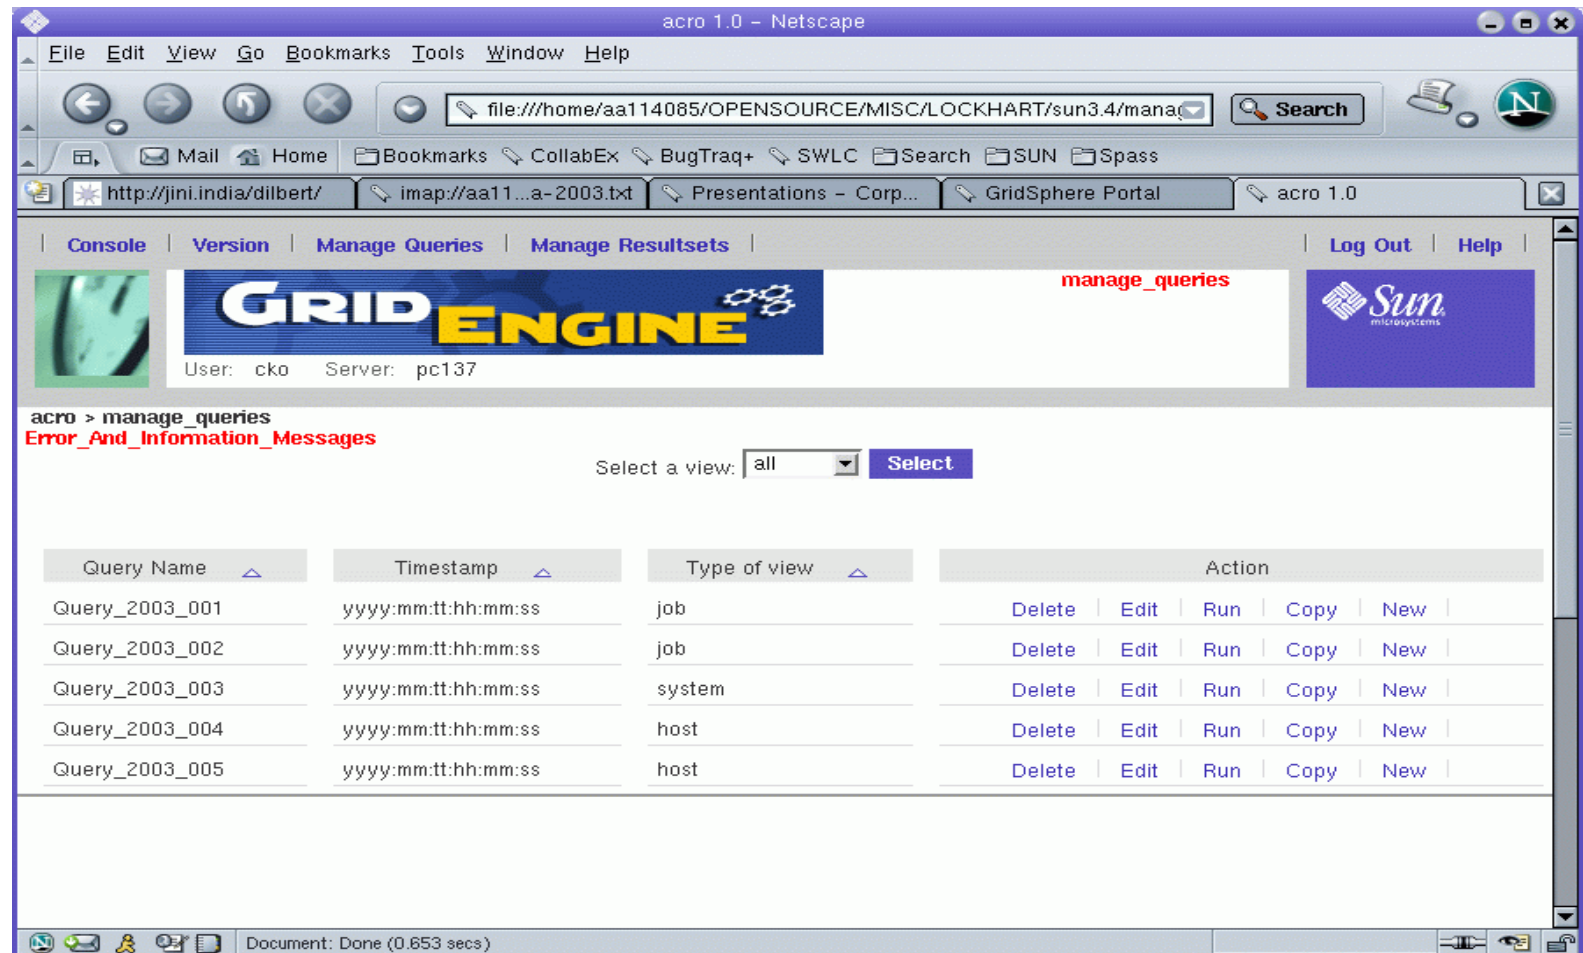

Navigation

Navigation (2)

- Manage Queries
 - List of stored queries
 - Management of queries
- Edit Query
 - Definition of new queries
 - Change of existing queries
- Query Parameters
 - user input like time interval as specified as late binding parameters in the query definition
- Reports

GRID ENGINE simple_query

User: cko Server: pc137

acro > simple_query
Error_And_Information_Messages

Simple Query | Advanced Query

Please select desired data view: Job View

This query will use the following fields:

Field Function	Field Name	Additional Parameter	User defined Name	add/delete
none	none			<input type="button" value="add"/>
Average of	j_cpu		time	<input type="button" value="delete"/>
	j_account			<input type="button" value="delete"/>
	j_start_time			<input type="button" value="delete"/>

To further constrain the query, enter additional requirements below.
 This query will be limited to data where: Masthead

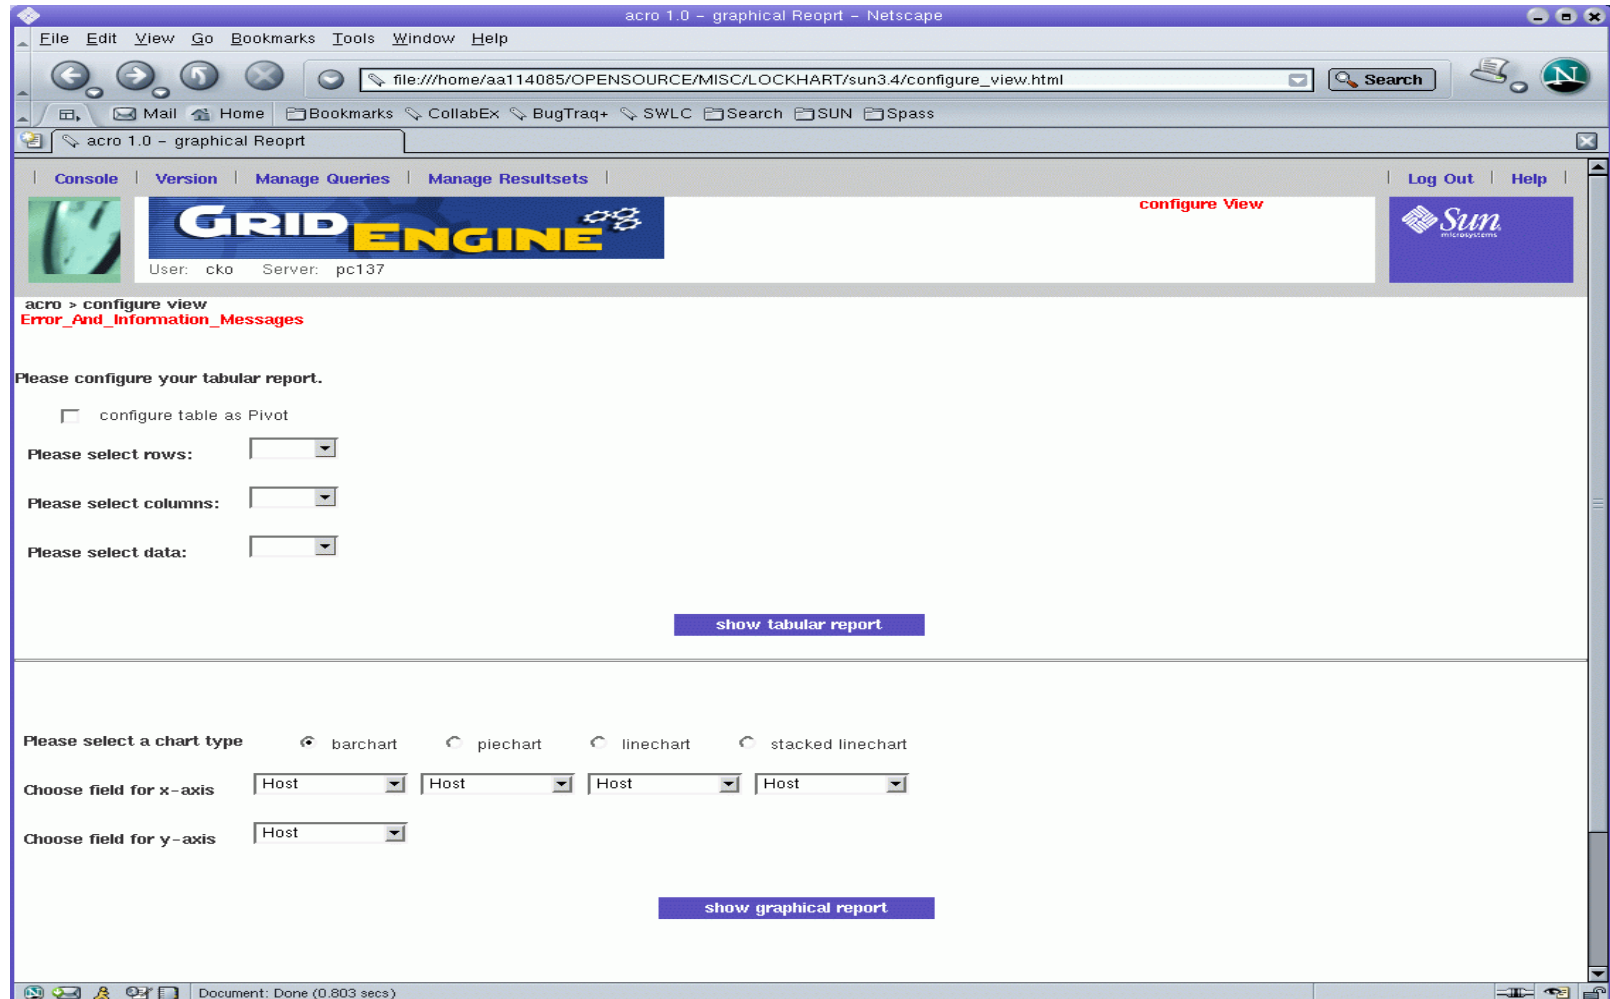

AND / OR	Field Name	Condition	Requirement	add/delete	late_binding	inaktiv
none	none	none		<input type="button" value="add"/>	<input type="checkbox"/>	<input type="checkbox"/>
	j_cpu	>=	130000	<input type="button" value="delete"/>	<input type="checkbox"/>	<input type="checkbox"/>
AND	j_account	=	'test_account'	<input type="button" value="delete"/>	<input type="checkbox"/>	<input type="checkbox"/>
AND	j_start_time	>=	2003-01-01 00:00:00	<input type="button" value="delete"/>	<input type="checkbox"/>	<input type="checkbox"/>

Sort by: none Limit query to first

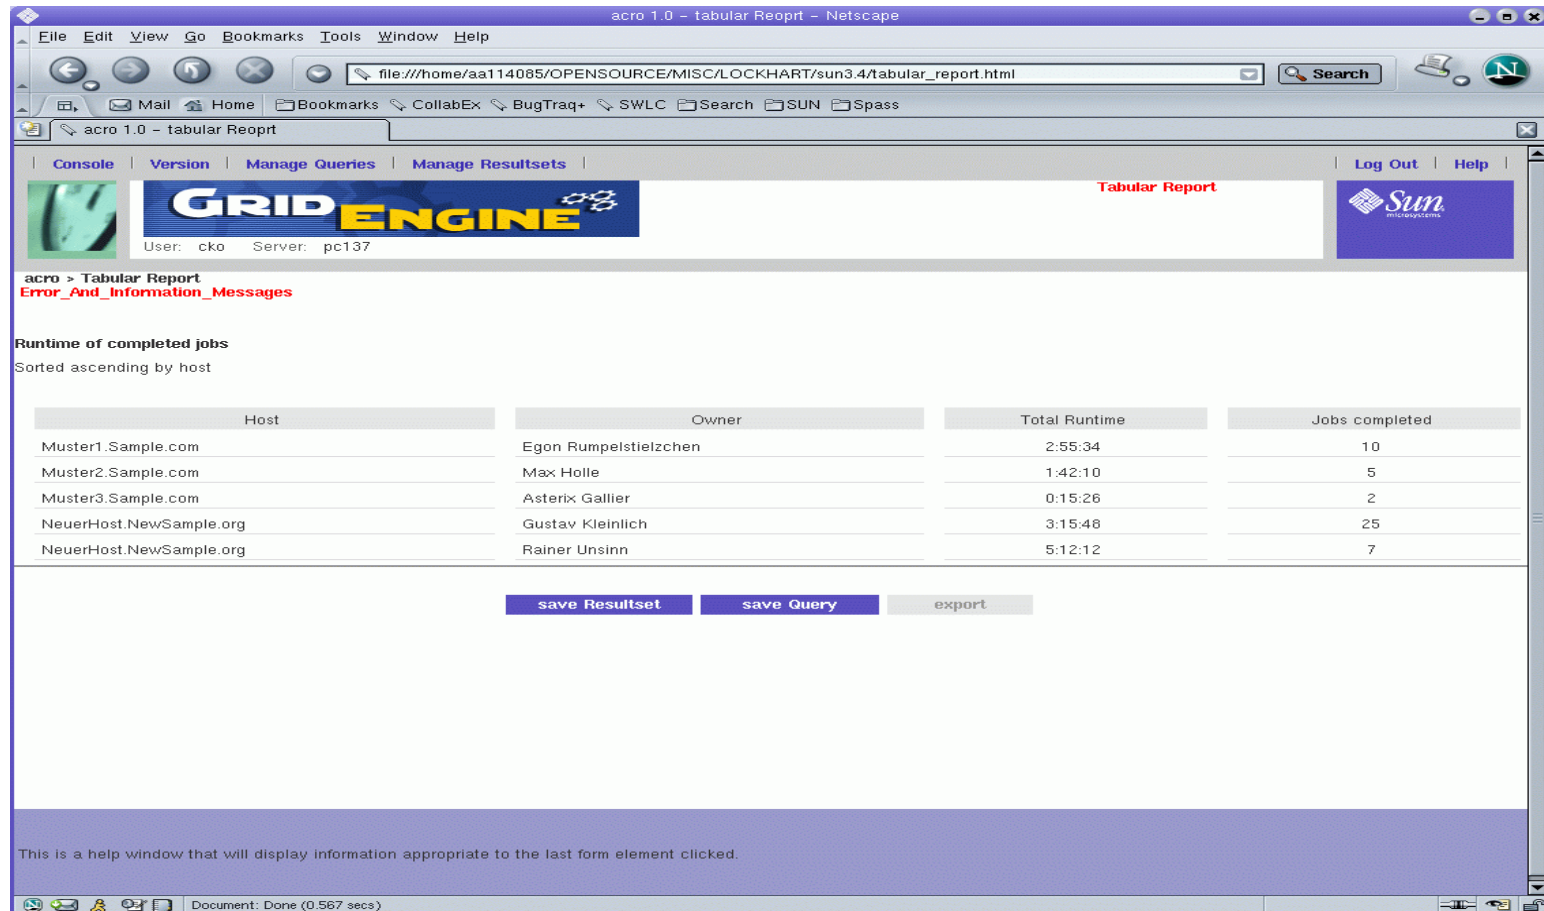

This is a help window that will display information appropriate to the last form element clicked.

Screenshot of UI Draft (6)

The screenshot shows a Netscape browser window titled 'acro 1.0 - Netscape'. The address bar contains the file path: `file:///home/aa114085/OPENSOURCE/MISC/LOCKHART/sun3.4/manage_resultsets.html`. The browser's menu bar includes File, Edit, View, Go, Bookmarks, Tools, Window, and Help. The browser's toolbar shows navigation buttons and a search box. The browser's status bar at the bottom indicates 'Document: Done (0.864 secs)'.

The web application interface is displayed within the browser window. It features a navigation menu with links for Console, Version, Manage Queries, and Manage Resultsets. The current page is titled 'manage_resultsets' and includes a Sun Microsystems logo and the text 'User: cko Server: pc137'. Below the navigation menu, there is a section titled 'Error_And_Information_Messages' with a 'Select a view:' dropdown menu set to 'all' and a 'Select' button. The main content area displays a table with the following data:

Name of Resultset	Description	Timestamp	View	Action
resultset_of_Query_2003_001	Description of Resultset	yyyy.mm.tt:hh:mm:ss	job	Delete View
resultset_of_Query_2003_002	Description of Resultset	yyyy.mm.tt:hh:mm:ss	job	Delete View
resultset_of_Query_2003_003	Description of Resultset	yyyy.mm.tt:hh:mm:ss	system	Delete View
resultset_of_Query_2003_004	Description of Resultset	yyyy.mm.tt:hh:mm:ss	host	Delete View
resultset_of_Query_2003_005	Description of Resultset	yyyy.mm.tt:hh:mm:ss	host	Delete View
